INACTIVE - ALL ITEMS SUPERSEDED OR OBSOLETE

Schedule Number: N1-142-86-004

All items in this schedule are inactive. Items are either obsolete or have been superseded by newer NARA approved records schedules.

Description:

Item A was superseded by N1-142-10-001, item 19e

Item B was superseded by N1-142-10-001, item 19e

Item C was accessioned by NARA, National Archives Identifier 41088802.

Date Reported: 07/28/2022 N1-142-86-004

Up until this time, the Project was planned to be a TVA owned and operated facility. However, as a result of changes in Federal priorities, it was decided that TVA should develop the Project to the point where it could be sold to a private consortium receiving financial assistance from the newly formed U.S. Synthetic Fuels Corporation (SFC). From the spring of 1981 on, the TVA effort was aimed at the design of a plant to be located in North Alabama and those activities necessary to organize a private consortium and obtain SFC assistance. | | |
| A total of five firms formally indicated a willingn to be Project sponsors and were at one time members the consortium proposing to take over the Project. | | | |
| The Project size was reduced several times to bette match market conditions and SFC funding limitations product slate was changed to enhance Project econom Most of the effort was on the production of methanoits use in motor gasoline. TVA undertook methanol/gasoline blend test and demonstration activities to support the methanol marketing effort. | . The ics. | | |
| In February 1985, the consortium withdrew its final plication for SFC support, and TVA announced that the Project was being placed in a defense energy reserve to be reactivated if and when required by national security considerations. These actions were taken of the drop in energy prices and lack of SFC support though OCG is being phased out, TVA has committed the placing the engineering work already accomplished in readily accessible files, retaining two of the major tracts in place, and reserving the site in the even Project is reactivated. This situation will be revannually and a status report prepared. | because t. Al- to tr con- t the | | |
